Download And finally disconnect the USB and connect to another usb port. As you have answered in the comment as well, the only advantage for the Windows PC is that it can check and update the firmware of the mobile phone more easily. The problem here is that in the future Huawei will offer the software updates through their website, and not USB. These updates can be found and applied directly from the PC to the mobile phone. The only advantage for the Windows PC is that it can check and update the firmware of the mobile phone more easily. The problem here is that in the future Huawei will offer the software updates through their website, and not USB. These updates can be found and
